Refrigerated Multi Deck (2 tier)

Overview

Chilled display units incorporating a cold well and 2 glass display shelves.
The unique Moffat innovative “Polar Air Stream” system provides a constant recirculating cold air curtain completely enveloping the food displayed. Holding pre-chilled food at a safe, regulated temperature while retaining taste and freshness. Perfect for sandwiches, fruit, yoghurt and cold drinks. Self-contained units with accurate, digital control, automatic defrost, high pressure warning and automatic condensate evaporation. Utilising a highly efficient, naturally occurring, hermetically sealed, hydrocarbon gas type R290 reducing carbon footprint and energy consumption.
Use individual or as a part of a specialised Moffat servery counter.

Key Features:

- With hygiene in mind all stainless-steel construction, inner panels are bright polished.
- 4 models in the range each with a chilled well and three fully adjustable glass shelves.
- Size 3, 4 & 5 have condensing unit set at 90° angle. Removes the need for unsightly vents in the front panels.
- Size 4 and 5 models have a storage space under at the operators left side.
- Digital thermostat and temperature control with automatic defrost.
- Advanced air flow design with unique polar air stream technology.
- Fully insulated efficient, eco-friendly, refrigeration. 24 hour operation.
- Maintaining the core product temperature of pre-chilled food below 5°C in ambient condition not exceeding 25°C and 60% relative humidity
- Automatic condensate water evaporation [no need to empty drip trays)
- Supplied with 2m long power cord and 13amp plug [13A 230v 50Hz]

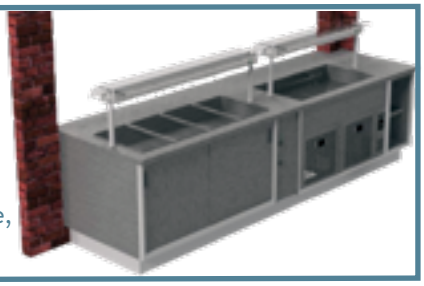

Options:

- Front roller blind codes.
  NB2:- size 2 unit, NB3:- size 3 unit, NB4:- size 4 unit, NB5:- size 5 unit.
- Lockable roller shutter models.
- Various colours and styles of front and side panels are available, plastic coated steel, laminated wood type or Corian.
- Various designs of overhead illuminates gantries are available, curved or square type glass, open or full front. Island, Deli, or traditional kitchen pass types can all be fitted.
- Solid tray slide or tubular tray rails fixed or fold down types.

Cleverly engineered Polar Air Stream System provides a constant cold air envelope.

COUNTER-TEK
Specialised Servery Systems

Each model can be made part of a specially designed bespoke Moffat servery counter, with integrated Granite, Corian, or Stainless worktops

Note: The standard unit depth is 700mm, These models are also available at 800mm deep.
Additionally when integrated into a bespoke counter, the worktop depth can be made to suit specific *design parameters.*

CRD2L

CRD3L

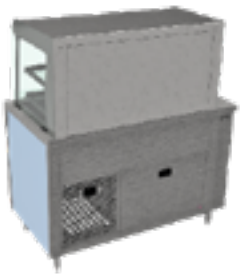

CRD3LFC

CRD3LSA

Note: All size 2 models have straight through ventilation, with limitations when placed close to a wall
(100mm air gap must be left for airflow to the compressor)
All other models size 3, 4,and 5 have the ventilation in and out on one side, with no restrictions on the opposite side and these can be place up against a wall.
