

**Overview**

Model P2HH - Dual Hot Cupboards with a neutral plain top

Model P2HHG - Dual Hot Cupboard with a neutral plain top & gantry

High-performance food transport and serving trolleys designed for institutional catering environments, featuring two heated compartments and a neutral flat top for flexible service use. Optimized for GN (Gastronorm) containers, these units ensure hot food stays at the ideal serving temperature during transport and service. Whether you're moving through long hallways, navigating elevators, or working within confined service areas, these trolleys offer safe, smooth, and efficient mobility.

Each heated cupboard is independently controlled, with temperature settings ranging from +30 °C to +110 °C, allowing precise thermal management for different food types. Inside, eight shelf positions per compartment, spaced at 71 mm intervals, allow for the transport of up to 16 x GN 1/1 containers 8 per side.

The plain top provides a durable, hygienic surface—ideal for prep, plating, or additional equipment placement during service. Built for durability, reliability, and ease of use, a trusted solution for hospitals, schools, care homes, and other institutional food service operations.

The P2HHG model has a gantry pass over shelf with full front screen, this is illuminated and heated by quartz type lamps.

Model P2HH  
(no gantry)

**Features:**
