

Overview

A high capacity unit designed specifically for holding hot food, ideal for displaying pies and pastries. The stylish, and compact design with optional coloured end panels makes for an attractive display where space is at a premium. Great for high demand outlets like sports stadiums and concert venues, or in any fast food outlet, café or canteen where a fast turnover in a short space of time is required. Featuring a pull out crumb tray with a built in humidity feature which helps prevent food from drying out, allowing food to be held in optimum condition for longer periods. Thermostatically controlled up to 110°C, the cabinet's robust stainless steel construction means it's both hygienic and easy to clean with four adjustable for height wired shelves which are easily removed. This electric heated pie cabinet can easily accommodate 200 freshly baked pies stacked or 100 pies not stacked depending in size. Accessible through sliding doors on both sides at any time during service. Complete with internal illumination for increase food display.
